PRICE TWO CENTS.

## STRONG ADDRESS GIVEN TO SENIORS

Annual Baccalaureate Service is Held Sunday Night at The First Baptist Church.

SERMON BY REV. W. E. CARROLL

Enjoyable Musical Numbers Feature of Program—Juniors and Seniors Attend in Body.

The annual baccalaureate service was held at the First Baptist church Sunday night and the address was delivered by the Rev. W. E. Carroll, pastor of the Central Christian church. The members of the senior and junior classes marched into the church in a body. This was the first public appearance of this year's senior class in a body. The church was crowded with relatives and friends of the class and the patrons of the school. Mrs. Don A. Bollinger delighted the audience with a beautiful solo accompanied by Mr. Bollinger at the organ and W. G. Masters, violin.

The members of the city ministerial association also participated in the service. The Rev. J. H. More, of the Presbyterian church, presided. The invocation was offered by the Rev. F. A. Hayward, of the Baptist church, and the scripture lesson was read by the Rev. O. G. Misamore, of the St. Paul Congregational church. The Rev. Charles W. Whitman, of the First M. E. church, offered prayer, and the benediction was pronounced by the Rev. William Weiler, of the Trinity M. E. church.

Mr. Carroll took his text from Philippians 4:13: "I can do all things through Christ who strengtheneth me."

In his introductory remarks, Mr. Carroll said that the words of the text were not "a vain boast of the Apostle Paul, but the assertion of individual liberty. We now understand the true value of an individual is measured by the standard of character. Rob Roy one time said in answer to a question as to what he was that he was a man that he might possess riches, social position and influence and then he would be only a man."

Ideals in life and purpose in life were emphasized by the speaker as (Continued on page 3, column 1)

## STRANGER MAKES THREATS AGAINST COLUMBUS OFFICER

Makes Statement That Friends of Man Shot at Columbus Last Wednesday Will Be Avenged.

While eating at the Phillips fish stand and restaurant on Indianapolis avenue Saturday a stranger, who is believed to be acquainted with the gang who broke open the freight car in this city last Wednesday morning and made an attempt to steal two barrels of whiskey made the statement that the friends of John Jones, one of the gang who was shot and killed at Columbus, would be avenged. The statement was made in the absence of Homer Phillips, the proprietor, whose father fired the shots that killed Jones, and an attempt to find the stranger later was fruitless.

The threat was telephoned to Mr. Phillips, the Columbus officer, who is confined to his home on account of bullet wounds sustained while trying to arrest Jones, but it did not alarm him in the least and he said that he considered it a boast and made the statement that he was not at all frightened. The injured policeman, is reported to be recovering as rapidly as could be expected.

Mrs. C. E. McConaughy and two children of Lebanon, came yesterday to make their home in this city. Mr. McConaughy is manager of the new theatre on South Chestnut street.

## SMALL COMPANIES HARD HIT BY ORDER

Telephone Toll Schedule Instituted at Midnight Saturday Serious to Local Farmers.

COST ALMOST PROHIBITIVE

Many Other Companies in State Are not Charging Tolls on Lines in Free Service Area.

The telephone toll schedule which was instituted on all lines in Jackson county at midnight Saturday is one of the most serious moves affecting small mutual companies that has been taken in recent years. Local business men and residents are aroused over the order as they realize that it will mean a radical reduction in the number of calls coming into the city. Many phones are maintained principally for use between homes here and the rural districts and the toll schedule now in force makes such service almost prohibitive. L. C. Griffiths, president of the Seymour Mutual Telephone Company, stated Saturday that the order came from the Burleson wire administration and that he had no control over the situation.

The order will mean the abandonment of some small mutual companies in the county, according to the belief of some of the stockholders. They point out that the lines were installed and are maintained at the sole cost of the subscribers and that the government has not taken over these lines. They further point out that the lines were built so that communication might be maintained to the Seymour exchange. A certain sum annually is paid by the subscribers for the connection with the local exchange which is intended to give them free service within the county. The stockholders and subscribers declare that the additional toll charge through the local exchange will make service almost prohibitive.

One thing that the farmers of this county cannot understand is why the toll charge on rural lines is made in Jackson county while free service is given as usual in some other counties. Some who have looked into the order declare that it is intended to increase the order only on intra and interstate business, but that there is nothing in the order as published that refers to intra county service where free service has always been given in the past. In fact, some insist that the wire administration has explained that such tolls were not to be instituted in free service territory where the cost of the service is now covered by rates based upon such free service.

The local telephone company insists that it has no option in the matter. Mr. Griffiths says that the order is interpreted to mean that tolls must be collected for county service the same as for inter-county service. The conflict is apparently due in various ways of interpreting the order.

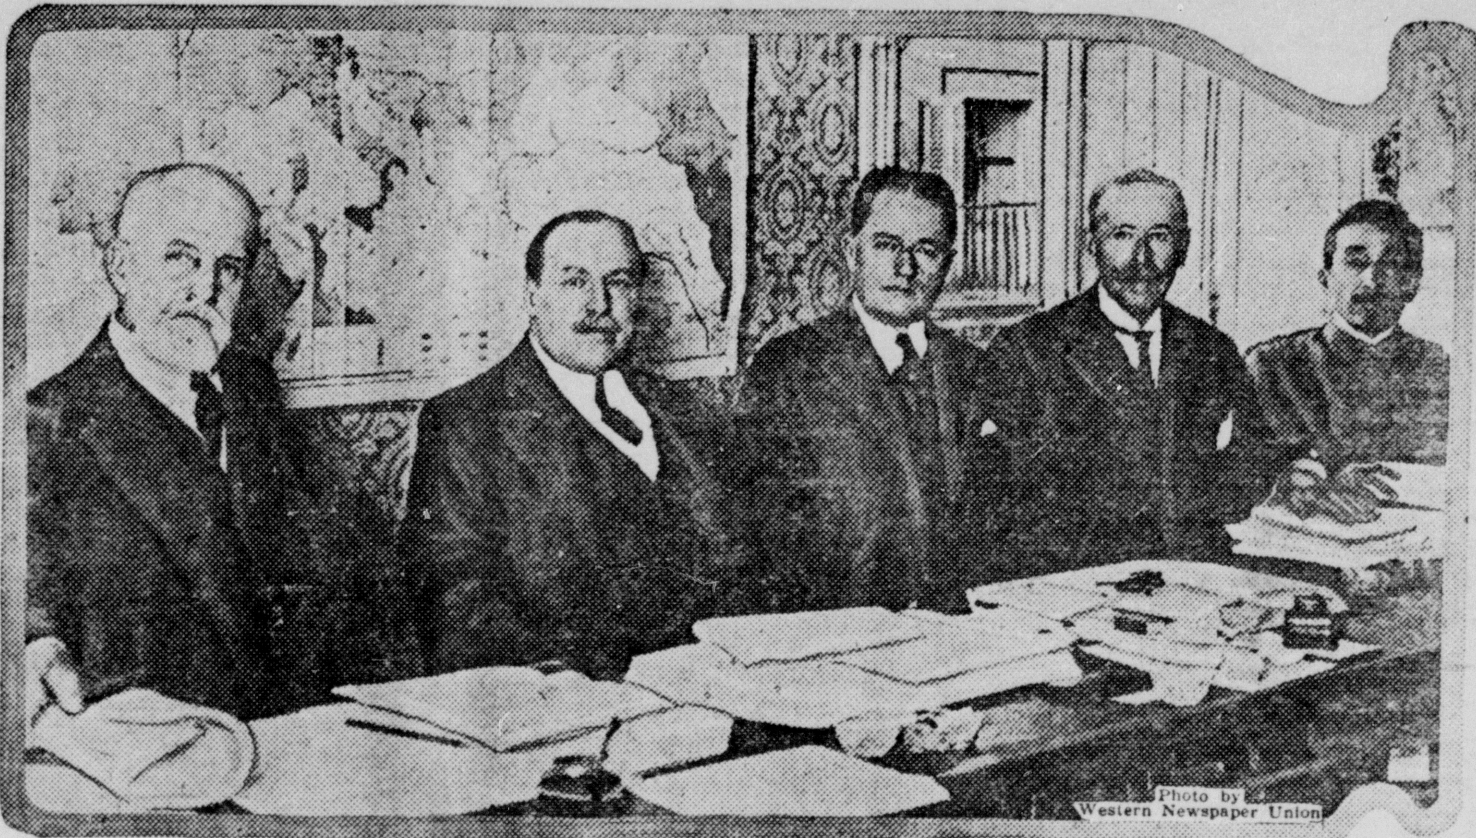

Whatever the correct interpretation may be, the public is fully aware that the toll schedule is a very serious one, especially for this city and Brownstown where the rural lines converge. It means that some communities are entirely cut off from the rest of the county so far as telephone communication is concerned, except on the payment of an excessive rate, in addition to a building and maintenance cost which is already assumed by the patrons.

## WILL APPRAISE LAND ON AN EQUAL BASIS

This Was Object of County Board of Review in Making Shifts in Several Townships.

The county board of review is striving to place all land in the county on the same basis of equality for purposes of taxation and it was with this in mind that several changes were made in township assessments. The board has averaged every section of land in the county and from these records compiled the average figures for each township. It is made clear that if any owner feels that an injustice has been done his objections will be heard.

## BOARD OF GOVERNORS OF RED CROSS LEAGUE

When the Red Cross societies of the world recently formed in Paris their world league, with Sir David Henderson as director general, the board of governors here photographed were chosen. Left to right: Senator Frascara of the Italian Red Cross, Sir Arthur Stanley of the British Red Cross, Henry P. Davison of the American Red Cross (chairman), Comte de Kerzorlay of the French Red Cross and Professor Ninagawa of the Japanese Red Cross.

## ART EXHIBIT WILL OPEN THIS EVENING

Special Program Arranged By Members of Seymour Art League For Opening of Annual Event.

PUBLIC INVITED TO ATTEND

Beautiful Paintings to be Exhibited—Owned by Thirteen Seymour Residents.

The Sixth Annual Exhibit to be given by the Seymour Art League will open at the Shields high school building this evening. A special invitation is extended to the public to be present for the opening event.

A special program has been arranged for this evening which will include music by the Seymour orchestra. The members of the art league will entertain and during the evening light refreshments will be served.

The work of hanging the many beautiful paintings was completed today and everything is in readiness for the opening event this evening. The paintings to be exhibited were loaned to the Seymour Art League by the following persons: Frank W. Able, J. H. Andrews, T. S. Blish, M. S. Blish, D. A. Bollinger, Lynn Faulkner, W. B. Gallimore, Tom Groub, Adelaide Miller, H. M. Miller.

(Continued on page 2, column 4.)

## REGIMENT OF ARMY WORMS PUT TO FLIGHT BY GUN

Local Woman Recalls How Her Father Saved a Meadow When He Saw the Worms Approaching.

Mrs. Sarah E. Hazzenzahl, who lives in the east part of the city, recalls that shortly after the close of the Civil War when the army worm caused great destruction throughout the country her father, Adam Wiesman, stopped them from entering his meadow by firing a shotgun before them. He saw the hundreds of worms in formation like ranks coming out of the woods which skirted the meadow and he fired four times over the line. They turned back and went into the woods and did not again try to enter the meadow, Mrs. Hazzenzahl recalls. Several reports of destruction caused by the army worm have been received and Mrs. Hazzenzahl thought the experience of her father half a century ago might be valuable to someone.

The Young Ladies' Auxiliary of the First M. E. Church will meet Monday, June 9th, at 7:30 p. m. with Mrs. LeRoy Miller, W. Second St., at LeRoy Miller, West Second St., at which time quarterly dues will be paid. A full attendance is desired. Be there! j9d

The boy will appreciate for his Graduation gift one of our Sterling Belt Buckles with genuine leather belt. Geo. F. Kamman, Jeweler.

## POLICE LOCATE WHEEL STOLEN NINE MONTHS AGO

John Hedricks Recovers Bicycle Taken from in Front of His Home Last September.

The police today recovered a bicycle belonging to John Hedricks, which was stolen from in front of his home last September. The bicycle, when located was in the possession of James Lester. Mr. Lester told the police that he had purchased it from J. Newt. Gibson and went with them to Mr. Gibson's home. Mr. Gibson told the officers that he had sold the wheel to Lester for \$20. He said that he got the wheel from a soldier several months ago when he came to his home about 9 o'clock at night and told him that he was without funds and wanted to sell the bicycle to get money to take him back to Camp Taylor.

Mr. Gibson said he advanced the soldier some money on the bicycle and after waiting several months for him to redeem it, decided to sell the wheel. The stolen machine was returned to its former owner and Mr. Lester was refunded the money he paid Mr. Gibson for the wheel, leaving the latter the loser to the amount that he gave the soldier for the stolen wheel.

## HOUSE DAMAGED BY FIRE THIS AFTERNOON

Fire Department Called to Home of Harvey Fields at North End of Blish Street.

The home of Harvey Fields, section foreman for the Pennsylvania railroad, at the north end of Blish street, was damaged by fire this afternoon about 2 o'clock caused by a defective flue. Mrs. Fields had been burning some old papers in a heating stove. The fire was discovered by neighbors who turned in the alarm. The firemen had some difficulty in getting started to the fire scene owing to the fact that the person reporting the fire did not state where it was at and some trouble was had in finding out.

However, the firemen arrived on the scene in time to extinguish the blaze with a fire extinguisher. The damage to the building and contents is estimated at \$30 and is covered by insurance.

Mr. Fields, who recently purchased the house had plans made to begin tearing the structure down Tuesday and he will replace it with a new dwelling.

## PARENTS' DAY OBSERVED AT SHIELDS HIGH SCHOOL

Large Number of People Visit School and See the Students at Their Work.

This is "Parents' Day" at the Shields High School and a large number of patrons took advantage of the opportunity to see the students at their work. Special arrangements were made for the parents at both the morning and afternoon sessions.

For the remainder of the term high school students will only have classes during the morning. School will be dismissed throughout the city Thursday for the term. The final report cards will be distributed at all of the buildings in the city Friday afternoon at 3 o'clock.

## INSECTS ATTACK MANY GRAPE VINES

Agricultural Classes Make Inspection and Report Leaves Are Destroyed by Plant Lice.

SPRAY OF NICOTINE SULPHATE

Effective Application of Solution Essential as Insects Must Be Completely Covered.

Many owners of grape vines in this city have reported that an insect is attacking the vines and the fine prospects for a big grape crop this summer are disappearing. The matter was brought to the attention of H. C. Henderson, in charge of the agricultural work in the city schools, and he had the agricultural classes make an inspection of many of the arbors which were attacked.

The classes found that the vines were covered with plant lice which work on the leaves. Some larvae of the lady bird beetle were found on the leaves he reported, and as they feed upon plant lice they will soon kill the insects. In many places, however, the plant lice were so thick that assistance was found necessary to combat them.

Mr. Henderson recommends that the grape vines be sprayed with a

(Continued on page 2, column 3)

## FEDERATION OF LABOR ENDORSES PEACE TREATY

Long Constructive Program is Set Forth in Report—Meeting at Atlantic Today.

By United Press

Atlantic City, June 9.—Unqualified endorsement is given the peace treaty and league of nations covenant by the executive committee of the American Federation of Labor in its report, submitted to the annual federation convention, opening here today.

The basic principles of a lasting peace are in the treaty the report says and adds that with a peace so built "the world has in truth been made safe for democracy."

A long reconstruction program called the "most complete and most constructive yet made in this country" is set forth in the report.

## JUNE 20 FIXED AS SIGNATORY DATE

More Optimistic Members of American Delegation Say This Will Give Enemy Week's Time.

REPARATIONS CONDITION

Territorial Committee Recommends Changes—Germany to Stand on Probation to League.

By United Press

Paris, June 9.—A speeding up process similar to that adopted for completing the German treaty, is now being applied to the counter proposals. The more optimistic members of the American commission predicted today that the treaty would be signed by June 20, allowing five days or a week between the time the treaty is handed Germans and the date fixed for their final answer.

Allied experts were reported to have reached an agreement whereby the specific amount of reparations will not be put in the treaty but France and Belgium will accede to some of their claims so German will know the total indemnities she is to pay within two or three months after the treaty is signed, instead of having to wait two years as first planned.

The league of nations commission was understood to have reached an agreement on the reply to the Germans demand for immediate admission to the league. While the agreement is yet to be ratified by the big four it was said to provide that Germany shall be admitted after a brief period of probation, although she will be excluded from the executive council.

The territorial committee, it was reported, has recommended rejection of Germany's demand for mandates over certain of her former colonies. This decision was said to have been reached despite the suggestion of American officials that she be given administration over her former territories in East Africa.

Foreign Minister Brockdorff Rantzau returned to Versailles yesterday from a conference with German government officials in Cologne. Col. House plans to go to London the latter part of this week, possibly in connection with preparations for the first meeting of the league of nations council in that city.

Provisions have been made for extending American occupation of the Hotel Crillon to autumn, so that Secretary Lansing, Henry White, General Bliss and various experts may remain to clean up unfinished business of the peace conference.

## NEW YORK BANKERS ARE CALLED AS WITNESSES

Senate Committee Begins Probe of the Alleged "Treaty Leak"—Morgan Subpoenaed.

By United Press

Washington June 9.—The senate foreign relations committee today subpoenaed J. P. Morgan, Frank A. Vanderlip, Jacob Schiff, Henry P. Davison, Thomas Lamont and Paul Warburg as witnesses in the investigation of the treaty leak. The committee instructed Lamont to bring with him all correspondence of Morgan & Co. from its Paris correspondents relative to the treaty.

The committee's action followed the presentation of a cablegram from President Wilson asking that an investigation be made of charges by Senators Borah and Lodge that the text of the treaty was in the hands of New York persons. Borah put into record at the same time a copy of the treaty which he said he procured from Frazier Hunt, a Chicago newspaperman. Democrats demanded a roll call on the question of putting the copy into the treaty and the vote was 47 to 2 in favor of Borah's motion.

## James A. Garfield

Said, "Business Colleges furnish their graduates with a better education for practical purposes than either Princeton, Harvard or Yale." But there are no accidental successes in business. Today's students of business are tomorrow's executives. Start now. Summer Term begins Monday June 16th. j14d&w

# Ford

THE UNIVERSAL CAR

The Ford One Ton Truck may well be classed as an agricultural necessity, it fits into and fills so many wants on the farm. It is a reliable bearer of farm burdens, not only doing the work of several horses quicker and better than the horse, and does not "eat its head off" when not working. The aggressive farmer has only to consider the possibilities of the Ford truck and he is ready to buy one. We judge this to be so from the way farmers are buying them. Truck Chassis \$550 f. o. b. Detroit.

## The Farmer's Truck

### COMMENCEMENT EXERCISES IN SCOTT COUNTY JUNE 14

W. H. Book, of Indiana University, Will Give Address—Six Townships.

The annual commencement of the Scott county common schools will be held in the court house park, Scottsburg, Saturday afternoon, June 14, at 2 o'clock. The invocation will be pronounced by Rev. W. L. Alexander. Dr. W. H. Book will give the class address and the benediction will be given by Elder C. R. Piety. The county superintendent, W. S. Griffith, will present the diplomas. Several musical numbers will be given during the afternoon.

There are five graduates from Finley township, of which Thomas O. Murphy is trustee; Jennings township, eighteen graduates, Ed. D. Casey, trustee; Johnson township, fifteen graduates, Harvey Napier, trustee; Lexington, twelve graduates, Mike Storen, trustee; and Vienna township, sixteen graduates, Virgil E. Craig, trustee.

### FINE CONCERT.

Large Crowd at City Park Sunday Afternoon.

The opening concert rendered by the Seymour band at the city park Sunday afternoon drew a large crowd. A fine musical program was rendered and the musicians were forced to give encores for several selections by the hearty applause from the many listeners.

The band has been undergoing some rigid rehearsals during the past few weeks under the direction of their leader, Adolph Steinwedel, and the result of their efforts was displayed by the members in the splendid concert given Sunday afternoon.

A Ford automobile driven by a Louisville man turned over on the curve near the Barbour farm on the Seymour and Dudleytown road Sunday. The occupants escaped injury and after some delay in getting the machine back in the road the automobile party was able to continue their trip to Louisville.

Ona Seegers, who is employed in this city, spent the week-end with relatives near North Vernon.

### INSECTS ATTACK MANY GRAPE VINES (Continued from first page)

solution of nicotine sulphate (black leaf 40). The report follows:

Black leaf 40 may be obtained at any drug or hardware store. Use about one teaspoonful to one gallon of water, to which may be added a one-inch cube of hard soap and thoroughly mixed. If a larger quantity is desired, use one fluid ounce to eight gallons of water, with the addition of one-half pound soap. The soap serves as a "sticker." Any cheap laundry soap will do.

In the use of nicotine sulphate the effective application of the spray is of the utmost importance. The insects themselves must receive a thorough coat of the spray, or they will not be killed. These insects obtain their food by suction, so will not be affected by "stomach poisons" as lead arsenate or Paris green.

A dark colored worm about one-half inch in length, which is the larva of the flea-beetle, is also doing some damage to the leaves of the grapes. The same treatment will do for these.

### FIRST EXCURSION.

Twenty-seven Local People Spend Sunday at Louisville.

Twenty-seven Seymour people took advantage of the excursion to Louisville Sunday on the Pennsylvania railroad. The special train carried fourteen coaches and more than eight hundred tickets were sold between Indianapolis and Louisville.

Some of the local excursionists witnessed an exciting event as the train was about ready to leave the Louisville station on the return trip when two officers took an intoxicated colored woman from the train. Four colored men went to her rescue which resulted in a "free for all" fight, and according to those who witnessed it the woman was relieved of some of her clothing in the affray, making it necessary for her to borrow a coat and some other paraphernalia from one of her gentlemen friends to make the trip to her home in Indianapolis after she escaped the officers and boarded the train again.

### G. H. Anderson's Bulletin.

We have just received a large supply of the famous Aviston's Special Patent Flour for wholesale and retail trade. This flour is manufactured out of hard winter wheat and every sack is guaranteed as to quality.

We carry a big stock of bran, middlings and shorts for sale.

Schumacher's hog feed is always carried in stock. All of this feed is on the basis of about \$10 a ton less than hominy meal but for feeders who prefer hominy meal we will have a full car load coming in.

We have on hands a full stock of Whip-o-will cow peas and also soy beans to be sold at a low price. Farmers can depend on getting a stock of feed here on any day that their wagons come in, and everyone that comes in once and gets our prices will come again.

We have a large stock of scratch feed for chickens and feed for little chicks at a very low price.

A good stock of Pocahontas coal on hands which will last but a few days as we will not handle any more Pocahontas coal this year. Anyone wanting anthracite coal can place orders as we will have an adequate stock. We advise that coal be bought now as the price will surely be higher. G. H. Anderson Elevator, North Chestnut street. j3d&wtf

### Save the Ten Cents.

Beginning June 10, a minimum price of fifteen cents for cash, and an additional ten cents when charged, will be made on all classified or other short locals. If the local is ordered by telephone the money may be sent to the office the same day before it is charged on our books and the extra charge will not be made.

We find the cost of charging these small items, making out bills and collecting them often amounts to more than the local itself. The extra ten cents that will be charged will partly compensate the office for this extra work and expense. But you can save it by paying cash when the local is ordered.

Exception will be made in the case of business firms with whom we have regular monthly accounts.

The Seymour Republican.  
The Seymour Democrat.  
j14d-19w

Relatives in the city have received word that Walter Hustedt has arrived safely from overseas where he was in active service with the American Expeditionary Forces for several months. He is now stationed at Camp Mills and expects to receive his discharge within a few days.

### ART EXHIBIT WILL OPEN THIS EVENING (Continued from first page)

Anna Mills T. A. Mott and B. F. Schneck. Besides the annual exhibit there will be an exhibit of work by local artists, public school exhibit and an exhibit by the sewing department of the Shields high school. The annual exhibit will be held in the high school corridor. The exhibit by local artists will be in room eight, public school exhibit in rooms six and seven and the sewing exhibit in room nine. The paintings owned by the Seymour Art League will be on display in room eight.

The exhibit will last for three weeks. The high school will be open every afternoon and evening in order that the public in general may have an opportunity to view the display. The exhibit this year promises to surpass all others so far held in Seymour and it will no doubt attract hundreds of art lovers in Seymour and the surrounding cities and towns. The pictures to be exhibited represent several thousands of dollars.

### INVASION FEARS INFLATED.

War College's 1915 Estimate of Foo Exaggerated.

The experiences of the United States in rushing troops overseas has made it evident that estimates given by the war department in 1915 that Germany, if not interfered with, could land 387,000 men in America in 16 days and 440,000 men in 31 days more were gross exaggerations. Gen. Peyton C. March, chief of staff, said. The war department estimate was submitted by the war college to congress in the year mentioned.

### Our Own Record.

"On May 1, 1917," said General March, "the army owned a troop fleet of ten vessels, with an estimated dead-weight tonnage of 52,725 and a troop capacity of 10,830 men. All these were boats which it would have been possible in an extreme case to put into trans-Atlantic service, but of that group of old vessels only one, the Buford, was permanently put into this service."

"Between April 6 and September 1, 1917, the first six months, the dead-weight tonnage of the United States army increased from nothing to 46,090 dead-weight tons. The troops carried eastward on these ships ran by months: April, none; May, 1,033, (carried on commercial liners); June, 12,621, (carried on commercial liners); July, 5,437; August, 5,458; September, 14,813. Total troops carried, 39,002."

"Beginning with November 11, 1918, the date of the armistice, and running through the six months up to and including April, we had carried westward 717,486 men."

"The 390,000 total deadweight of army ships on November 11 included the Leviathan and other German ships taken over during the war. The rapid increase in the troop fleet since that time is due almost entirely to the making over of cargo ships into troop-carrying ships. Up to April 1 cargo ships of 538,000 tons had been converted into troop-carrying ships. These ships formed 58 per cent of the troop fleet in tonnage, although not in carrying capacity."

### Quite Impossible.

"About the war department statement in 1915, a pamphlet having the title, 'Statement of a Proper Military Policy for the United States.' This statement contained an estimate of the number of troops which could be landed on our shores, provided there were no interference. Germany had the most; the estimate as to her was 387,000 men in 16 days, and an additional 440,000 in another 31 days. It was stated that these men could carry with them 176,000 horses and all the necessary equipment, munitions, supplies, and other impedimenta for three months. In about the same space of time it was estimated that France could land 404,000 men, Austria, 180,000, and Japan, 238,000, all with large numbers of animals and the necessary impedimenta for three months."

"Our experience in this war shows that these alleged facts are quite impossible. We have learned that you cannot mobilize ships, men and supplies with the ease and speed calculated in the statement. Ship performances cannot approach the performances assumed. Our fast troopships have averaged close to 35 days for a complete turn around to France and back, our cargo ships 70 days. The statement assumes that all ships, including cargo, would average 30 days for that distance."

"This statement shows how lacking we were in knowledge of the problem of shipping large armies overseas. There was no experience of our own or of foreign countries to guide us. The transportation overseas of the American army as an achievement is literally unprecedented."

Mr. and Mrs. A. D. Eldridge have received letters from their son, Lawrence and Charles, who are in military service in France. Lawrence is stationed near St. Nazaire and Charles is located near Toul. They are expecting to return to this country during the next few weeks.

H. E. Kattman, of Brownstown, was transacting business in the city this morning.

Business Men's Envelope

The Most Popular  
Envelope in  
Seymour

THE SEYMOUR DAILY REPUBLICAN  
108 West Second Street, Seymour, Indiana

This is our old Hoosier  
XXX friend under  
a new name which  
was chosen as a result of  
the recent contest for a new  
name for this popular en-  
velope.

B-M-E is a good med-  
ium grade envelope suited  
to business correspondence  
and yet low enough in price  
to be used for circularizing  
when needed.

The new name is a very  
satisfactory description of  
the envelope. The exper-  
ience of scores of Seymour  
business men has made it  
distinctly what its name  
implies—the

*Business Men's Envelope*

How is your supply of  
envelopes? Look them up  
and let us supply you with  
B-M-E. You will appreci-  
ate their use and will share  
with others the pleasure of  
a good every day envelope  
for your business corres-  
pondence.

Telephone 42 and let  
us print you a supply.

tage and pass it one to the succeed-  
ing generation with a contribution  
that you may make that you, in a  
measure, atone for your deep obli-  
gations for the privileges you now  
enjoy. To the man with no purpose  
in life there must ultimately come  
failure.

If you become so absorbed in your  
work that you can see nothing else  
you will soon lose your way. The  
ship in order to reach the port must  
be guided by the stars of heaven. If  
you have a purpose in life, you will  
derive strength in the hour of crisis  
to do your best. The thing that real-  
ly made Rome great was her firm de-  
termination to pursue the course  
when once she had chosen it. Greece  
is known for her art and literature,  
for her men of learning, yet Greece  
does not stand out in the world's his-  
tory as does Rome. For it was Rome  
that refused to swerve from her  
course regardless of what the price  
might be. To an inspired soul diffi-  
culties will not hinder the achieve-  
ment when once the way is clear. It  
is the spirit of Henley in his lines  
when he says:

It matters not how straight the  
gate.

How charged with punishment the  
scroll.

I am the master of my fate,  
I am the captain of my soul.

"It was the same spirit that domi-  
nated the Greek orator when he said  
'the time will come when you will  
hear me gladly.' There are many  
illustrations that we might use to  
prove this truth, but one will suffice.  
Jenny Lind stood one time before an  
audience in Havana where she was  
greeted with a storm of hisses. From  
every nook and corner of the great  
hall came that hissing hail-like note  
of disapproval. For a moment she  
stood irresolute and affrighted; her  
face bloodless as the snow, but only  
for a moment. For in that awful  
searching moment she resolved with-  
in herself that she would conquer  
the hostile throng and bring them to  
her feet. Then she began to sing.  
She sang as Jenny Lind had never  
sung before, sang until the air was  
heavy with sweetness, sang until it  
seemed that all the birds of heaven  
were let loose in that single hall,  
sang until the orchestra sat mute  
and motionless, gazing upon her as  
if she were an angel, sang until  
Spanish hate was turned into respect  
and respect into wonder and wonder  
into adoration, and when the last  
note had been shaken from that  
golden throated nightingale, five  
thousand men and women arose in a  
veritable Niagara volume of ap-  
plause to the challengeless queen  
of song.

"The Apostle Paul speaking out of  
the experiences of his own life, after  
having tasted the fruits of victory  
and the bitterness of struggle well  
understood by this power given to  
him from above that he could stand  
whatever the cost. At the laying of  
the cornerstone of the monument on  
Bunker Hill, Daniel Webster was the  
orator of the day. The crowds that  
had gathered there began to press on  
him. Lifting his voice he said:  
'stand back! stand back.' Immedi-  
ately came the answer, 'Impossible.'  
Then it was that Webster lifting his  
voice said: 'Impossible! Impossible!  
Nothing is impossible on  
Bunker Hill! Stand Back! Stand  
Back.' So in the hour in which you  
live. Since Jesus came this way,  
nothing is impossible. And in the  
language of the Apostle Paul, 'I can  
do all things through Christ who  
strengtheneth me.'

#### Holiness Christian Church.

Another large crowd was present  
last night. One at alter, two joined  
the class. The class is growing each  
week. Beginning Wednesday eve-  
ning, June 11, at 8 p. m., there will  
be preaching services at the church.  
The preaching will be in charge of  
two young men who have been in  
the U. S. army. Both young men  
have been saved at the church in the  
last two weeks. There will be spe-  
cial music each evening. These  
meetings will begin Wednesday eve-  
ning, June 11 and close Friday eve-  
ning, June 13. Come.

W. P. Masters returned to Indi-  
anapolis this morning where he is  
completing a cement road contract  
at Fort Benjamin Harrison, after  
spending Sunday at home. Mr.  
Masters expects to have the road  
completed within the next week.

Highest prices paid for cream,  
poultry and eggs. Kentucky Cream-  
ery at Stop 72, south of city.

Lawrence Pollert, son of Mr. and  
Mrs. Henry Pollert, arrived here  
Saturday, having been mustered out  
of the navy after twenty-two  
months' service. He spent about a  
year overseas.

A daughter was born to Mr. and  
Mrs. Henry Kasper, corner Seventh  
and Blish streets, this morning.

#### STRONG ADDRESS

GIVEN TO SENIORS  
(Continued from first page)

the essentials in making a life.  
Speaking on the subject of ideals and  
directing his remarks to the members  
of the graduating class he said:

"During your high school career  
you have been receiving certain moral  
preparations for life. It is now  
yours to hold these ideals and inspir-  
ations as you go out into the world  
to attempt the tasks that you will  
undertake. We ask you, then, are  
your deals for the God of the living  
or for the God of the dead? To ac-  
cept conditions as you find them will  
mean the admittance of an inertia in  
your lives. Hold to your ideals and  
keep faith in man and God if you are  
to attain a marked degree of success.  
To the man who has no faith and no  
purpose in life there can be no moral  
disappointments. It was not the half  
hearted Aaron who broke the tables  
of stone when the people were wor-  
shipping the golden calf, but Moses  
who was on fire with passion for God.  
"If your life is to count in the  
world of affairs you must learn the

lesson of subordinating all your ac-  
tivities for the good of others. On  
the Mount of Temptation Jesus was  
offered the kingdoms of the earth if  
he would but fall down and worship  
the tempter. All this He refused that  
He might remain true to His ideals and  
to the purpose for which He came into  
the world. Napoleon experienced  
fifteen years of victory followed by  
three years of defeat. The three  
years of defeat robbed Napoleon of  
all the victories he had achieved. He  
learned not the lesson of subordinat-  
ing his desires for the good of oth-  
ers. You will find that to attempt  
to achieve success apart from char-  
acter will mean a weakening of the  
forces that tend to make for things  
that are worth while. As someone  
has said a man may gaze upon power  
until he becomes blinded by its rays.  
To the man of brilliancy there is a  
spirit of impatience when others are  
unable to see from his viewpoint, re-  
sulting in intolerance, discouragement  
and often failure. In more re-  
cent times we are beginning to under-  
stand that a man can win real suc-  
cess through failure. Washington  
and Lincoln bear witness to the fact  
that even through discouragements  
and disappointments it is possible to  
achieve a notable victory.

"It will be for you to choose be-  
tween selfish and unselfish service.  
The engineer for tomorrow in design-  
ing a bridge must bear in mind not  
alone the vehicles of transportation,  
but the burdens of commerce which  
the bridge must sustain. The phy-  
sician ministering to the needs of the  
people must always have in mind the  
health of the community in which he  
lives. The true lawyer must always  
consider the social structure in any

case in which he may be engaged.  
One question will come to you times  
without number. Has your high  
school career the better fitted you to  
earn a living. You may be ambitious  
to take your place in the social strata  
which may be near you. You may be  
influenced by public opinion to yield  
to certain influences, but remember,  
that Christ on Palm Sunday when the  
multitudes strew flowers in His way  
was none the greater than when five  
days later the same multitudes were  
crying out 'Crucify Him.'

"A man's life must be larger than  
his works. Men will argue over a  
principle for years, but let a real  
leader appear and they will follow  
him to the ends of the earth. We  
value life as a field of action and as  
such would remember the motto that  
Thermopylae had her messenger of  
death and The Alamo had none. The  
doing makes the deed and unselfish-  
ness makes the life. If you value  
the world for what you can get out  
of it, the world will value you for  
what it can get out of you. In such  
a frame of mind you may have friends  
and prosperity but not in adversity.  
Regarding the second division of  
his sermon, that of purpose, Mr. Car-  
roll said:

"True ideals will lead to action,  
but any attempt to rest upon mere  
conventionalities will mean that in time  
of crises the framework will be in-  
sufficient to sustain you. We can-  
not hope to rest upon past achieve-  
ments. It was Faust who said, 'The  
real danger of a fall came not from  
clouds of darkness and despair, but  
when the individual reached the place  
that he was satisfied with himself.'  
Any renunciation of effort for furth-  
er progress means death to the hu-

man soul. If your ideals are ahead  
of your practice, all is well. But if  
your ideals sink to the level of your  
practice, however, high your practice  
and ideals may be, death will surely  
come. The Pharisee had reached in  
practice the ideals to which he held.  
The Publican, though low and humble  
and very low in practice dreamed of  
and very low in practice dreamed of  
better things, and it is here that we  
have the approval of the Master as  
He understood the struggles and  
yearnings in the breast of the des-  
pised publican. It is for you to de-  
cide which course you will pursue.  
You may choose a social position,  
fortune and friends upon which you  
may ever look with increasing com-  
placency and attain a marked de-  
gree of success. But to choose the  
way of the christian will mean fail-  
ures and danger, misunder standings  
and doubts and in the end you may  
not attain the high goal which you  
have set for yourself. Yet, however,  
your real leadership and worth in  
the community may never be known  
unless some grave crisis comes into  
the life of your day. As we find ex-  
emplified in the career of Lloyd  
George. Many of England could not  
tolerate Lloyd George, but in the  
hour of peril they must yield to his  
leadership because of his true worth  
and the principles for which he stood.

"The hour in which you live has  
been made possible because of the  
rich heritage bequeathed unto you.  
Others have gone before, your fath-  
ers and your mothers and have lab-  
ored that you might enter into their  
labors. Every effort of yours must  
be in deep appreciation of the indebt-  
edness which you have received. And  
in turn it is yours to accept this heri-

#### For Burning Eczema

Greasy salves and ointments should  
not be applied if good clear skin is  
wanted. From any druggist for 35c, or  
\$1.00 for large size, get a bottle of Zemo.  
When applied as directed it effectively  
removes eczema, quickly stops itching,  
and heals skin troubles, also sores,  
burns, wounds and chafing. It per-  
meates, cleanses and soothes. Zemo is  
a clean, dependable and inexpensive,  
antiseptic liquid. Try it, as we believe  
nothing you have ever used is as effec-  
tive and satisfying.

## SOCIAL EVENTS

### BRIDGES—ZANDER.

Miss Jennie E. Bridges of this city and Carl H. Zander of Indianapolis, were married Sunday afternoon at 2:30 o'clock at the parsonage of the First Methodist church, by the pastor, Rev. Chas. W. Whitman. The ring ceremony was used. Those present were Mrs. Ethel Bridges, of Crothersville, Fred Cooper of Sacramento, Calif., Misses Amy and Hester Bridges. Immediately following the ceremony Mr. and Mrs. Zander left for future residence in Indianapolis.

Mrs. Zander is the daughter of Mr. and Mrs. E. E. Bridges, 116 North Lynn street, and until recently was employed as a linotype operator in The Republican office. She was graduated from the local high school in the class of 1914, and has a large number of friends in this city.

Mr. Zander recently was discharged from military service having been overseas with Battery B, 70th Artillery. He was discharged from Camp Sherman, Ohio, and has since been employed in Indianapolis. Prior to his enlistment he was a linotype operator at the Democrat office.

### BIRTHDAY SURPRISE.

Mrs. Edward Mellenkamp and her brother, Edward Sutherland, were pleasantly surprised at Mrs. Mellenkamp's home at 507 West Jackson street Saturday evening, when a large number of friends gathered there. The evening was spent with music and games and a light luncheon was served. They were presented with many useful gifts.

Those present were: Mr. and Mrs. John Mellenkamp and son, Walter, Mr. and Mrs. William Sutherland and sons, Walter and Albert, Mr. and Mrs. Fred Herkamp and family, Mr. and Mrs. Sam Sutherland and family, Mr. and Mrs. Harry Emhuff and family, Mr. and Mrs. Edward Stuhler and family, Mr. and Mrs. Fred Stabb and family, Mr. and Mrs. Edward Mellenkamp and family, Mr. Harvey Sutherland and daughter, Geneva, and Miss Hazel Dart.

### ENTERTAIN.

August Vornholt, who lives north of Cortland, entertained a number of young people Sunday. During the afternoon the members of the party attended a base ball game. After the game a dinner was served at the Vornholt home, following which a lawn party was enjoyed. About fifty people attended. Among the out-of-town guests were Misses Clara Clapp and Anna Olinger, of Indianapolis.

### PICNIC.

A picnic was given Sunday afternoon at Indian Mound, by a number of the students from the Seymour Business College. The chaperons were Misses Hattie Roeger and Jean Clark. The students were Miss Helen Phillips, Miss Selma Teulker, Miss Ruby Smith, Miss Anna Zimmerman, Dewey Craig, Albert Rehber, Bert Ulm and Lawrence Kasting.

### SIX O'CLOCK DINNER.

Miss Mona Reed, North Mill street, entertained with a six o'clock dinner Sunday evening. Covers were laid for Miss Madeline Reihl, Miss Nora Cadem, Miss Mona Reed and Miss Thelma Reed, of Indianapolis, George Roemmel, Rex Whitson, Cash McOsker and Albert Milburn, of Indianapolis.

### TWELVE O'CLOCK DINNER.

Mr. and Mrs. C. P. Tovey entertained with a twelve o'clock dinner Sunday in honor of their guests. Covers were laid for Mr. and Mrs. G. L. Tovey of Bedford Will Tovey and three sons, of Ogilville, Mr. and Mrs. Ed McQuary, of Brownstown, Lavena Tovey, Nevian Tovey and Will Weathers.

### SWIMMING PARTY.

The swimming pool at the city park has been engaged from 9 until 11 Thursday evening for the members of the Bachelors' Club and friends.

### COMING EVENTS

#### TUESDAY—

Christian Aid Society at church.

Baptist Sewing Society at church.

Eastern Star Club at Masonic Club rooms, 2:30 p. m.

### ANTWERP LIVENS UP

Port Passing Through Period of Resurrection.

Ships Begin to Come Straggling Into Harbor Made Desolate by War.

Antwerp.—Antwerp appears to be passing through a process of resurrection, although the tonnage handled since the port was reopened more than three months ago represents what would ordinarily come through this port in one week during the days prior to the war.

Ships now come straggling in, and along the seven-mile water front the which is heard creaking here and there, and the vision in some of the great sheds is obstructed by unpretentious stacks of bags of American rice and rows of barrels of Chicago pork, and there are foodstuffs, clothing and manufactured articles, most of which, however, is for immediate use.

The American commission of relief in Belgium had 17 steamships in port early in April and the American base for supplying the American army of occupation in Germany was unloading five others.

Shipping men are anxiously awaiting the opening of the American base at Contich, about two miles outside of Antwerp on the Malines road. Barracks are being erected at Contich for the accommodation of 20,000 soldiers at a time. This is expected to inject a little more life into Antwerp port.

The ground picked out for the American base is a vast plain, dry and well irrigated, and the doughboys will find living and sanitary conditions there much better than in other bases which have achieved greater prestige.

The Americans have taken over some of the piers where North German Lloyd steamships formerly docked. The early work was arduous, as the piers were incumbered with gravel imported from Holland by the Germans, ostensibly to repair roads, but actually to build re-enforced concrete shelters, dugouts and trenches. One hundred cubic yards of the gravel had to be removed before the piers could be used. It is estimated the Germans had enough gravel there to repair Belgian roads for 50 years.

Fifteen thousand longshoremen and stevedores are idle here and the only solution shipping men find when questioned as to how the situation can be remedied may be summed up in one word: "America."

### FIND FEMALE "NOT DEADLIER"

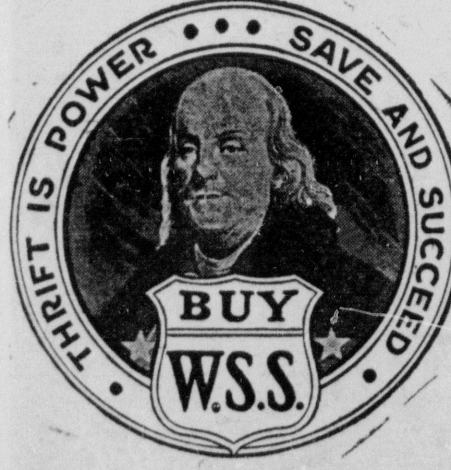

New York Finger Prints Show Decrease—Only Degenerates Increase.

New York.—The city's finger-print records for 1918 tend to prove that the female of the species here is not deadlier than the male. In announcing a decrease in the number of prints taken at the 16 magistrates' courts, Fred A. Hart, supervisor of this work, said that this class of records, of females had dropped 51 per cent and that of the males 48 per cent, as compared with 1917.

More than 1,000,000 finger prints were taken during the year. Only the degeneracy class showed a large increase, 85 per cent.

The big decrease among females recorded is attributed to "better conditions in the labor market and the opportunity for greater reimbursement than in ordinary times," owing to so many men being in military and naval service. The decrease among men recorded was declared to be due to the "work or fight" order, driving idlers into government service or essential occupations.

### MISS PEARL CLARK WILL HEAD ADVISORY COMMITTEE

Appointed Chairman of New County Committee in The Republican Organization.

Dr. H. Lett, Republican county chairman, has appointed Miss Pearl Clark as chairman of the woman's advisory committee of the Jackson county organization. As chairman of the committee she will become a member of the district advisory board.

The women in the Republican party are forming an aggressive or-

ganization which will have great influence in the coming campaign. This is the first step that has been taken in effecting the new organization. Members of the advisory committee will be named in each township in the county and the members will meet from time to time to participate in the active work of the campaign.

Mr. and Mrs. Ivan Love, Miss Marie Nichter and George Roemmel will go to North Vernon this evening to attend a dance at the Philbarg hall.

Thousands of Eyes See "Republican Classified Ads."

**Your Biggest Wishes Answered!**  
You who are wishing for—  
—a refrigerator that will keep foods longer and consume less ice  
—one that doesn't get "smelly" and doesn't interchange food flavors

### Drilled for Water; Read What He Found

De Pere, Wis.—The discovery came too early for the day of the big thirst, but Jules Dufrene says he expects to enjoy for many a day to come four jugs of 300-year-old cognac.

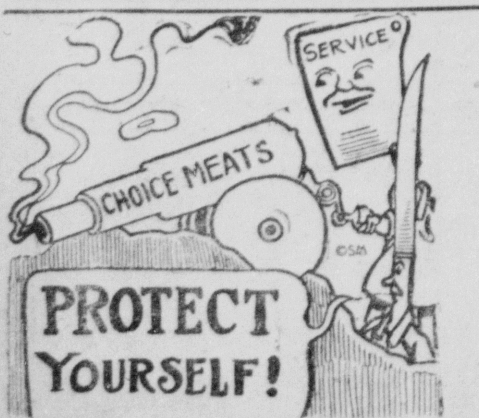

The jugs bear the seals of Louis XIV, with the fleur de lis, and had been buried by early traders.

Dufrene found the jugs when drilling for a well on the site of an old French trading post.

### Daniel Is Fireproof.

Bristol, Pa.—Daniel Sweeney, a shipyard employee, is fireproof. Sweeney went to sleep in a bunkhouse with a lighted cigarette in his mouth. A few minutes later some of his companions noticed smoke issuing from his room. Sweeney was found sleeping peacefully with the bedding ablaze and his vest burned off. He did not suffer a burn. He was arrested and held until he could pay for the cost of the bed.

Joe McDonald and Fred Bacon left this morning for Greencastle to attend the commencement exercises.

Protect yourself against the indisposition that ill health brings one by letting this Quality and Service shop serve you with the choicest meats ever apportioned for your enjoyment.

George Heins spent Sunday in Columbus.

Roy Newby visited in Columbus Sunday.

Earl Harrington spent the week-end in Cincinnati.

John Keegler spent Sunday with relatives at Louisville.

Mrs. Alice Merz, of Columbus, visited in this city today.

H. M. Lutes of Houston, transacted business here today.

Will weathers will attend the dance at North Vernon this evening.

Mrs. Emily Crane, of Jonesville, was here Saturday afternoon.

Fred Burbrink of Jonesville, was here this morning on business.

Mr. and Mrs. Lem Day visited in Brownstown Sunday afternoon.

Nathan Kaufman is spending a few days in Chicago on business.

Clarissa Sweeney of Reddington, was here this morning shopping.

Miss Viola Alves spent the week-end with relatives in Indianapolis.

John Brooks, of Flemings, was here Saturday afternoon on business.

John R. Lutes of Houston, was in Seymour this morning on business.

Mrs. John Zimmerman of Redding township, was here today shopping.

Jesse Collins of Chestnut Ridge, was a business visitor here today.

August Bobb of Dudleytown, transacted business here this morning.

Ernest Rittman of Redding township was in Seymour today on business.

Mr. and Mrs. Charles Parker visited in Brownstown Sunday afternoon.

Miss Tillie Niewedde, of Cortland, spent the week-end with relatives in Cortland.

Miss Alma, Steinkamp went to North Vernon this morning for a short visit.

Mrs. George Owens was in the city this morning enroute from Medora to Indianapolis.

Geo. A. Clark will go to Indianapolis this evening to attend the Shriner's Convention.

Mrs. Frank Brodt, of Indianapolis, is the guest of Mrs. Clem Roegge, North Broadway.

Mrs. Edgar Welsh and Miss Ellen Welsh, of Brownstown, spent this morning in the city.

Ralph Thompson, of Purdue, is spending the summer vacation with relatives near Cortland.

Mr. and Mrs. Wm. Furnish of Scottsburg, spent Sunday with Mr. and Mrs. Howard Furnish.

Samuel Newby left Saturday evening to spend his vacation in New York and other eastern points.

Miss Tessie Lucas, who has been visiting in Newcastle returned to her home in Freetown this morning.

Mrs. U. E. Elrod, who has been visiting here for several days, returned to Cincinnati this morning.

Miss Marie Bedel returned to Holton Saturday afternoon after a short visit with Marion Abel and family.

Mrs. J. L. Blair went to Indianapolis this morning where she will be the guest of Mr. and Mrs. Roy Van Horn.

Mr. and Mrs. W. E. Hoadley, Misses Gertrude Burkart and Virginia Hoadley spent Sunday in Columbus.

Irving Crane, Ernest Ford and Frank Abel, of Jonesville, were in Seymour Saturday afternoon on business.

Mr. and Mrs. Wm. Snyder, Miss Hazel Johnson and Scott Hardin motored to Cincinnati and spent the week-end.

Mrs. Jack Tinch returned to Indianapolis this morning after a short visit with her parents, Mr. and Mrs. D. O. Abel.

Miss Mary Lee Galbraith returned this morning after spending the week-end the guest of friends at Bloomington.

Miss Viola Stevens, who has been the guest of her sister Mrs. Earl Clow, has returned to her home in Indianapolis.

Mr. and Mrs. G. L. Tovey, of Bedford, who have been the guests of Mr. and Mrs. C. P. Tovey, left Sunday evening for Indianapolis.

Mr. and Mrs. Edward Dreas and children and Mr. and Mrs. W. H. Sanders and son motored to Shoals Sunday for a visit with relatives.

Mr. and Mrs. Roy Vaughn, who have been spending several days with relatives here, returned to their home in Lafayette this morning.

Mr. and Mrs. Hillis Welsh and Mrs. Lydia Needham returned this morning from a week-end visit with Mr. and Mrs. J. W. Cobbs in Indianapolis.

FIX BUSS RAILWAY

Allies Are Planning to Raise Necessary Money.

It Will Take \$20,000,000 to Put Trans-Siberian Railroad Line in Shape.

Washington.—It will take \$20,000,000 to put the Trans-Siberian railroad in proper working condition. Eight nations are now trying to finance the road temporarily, without waiting for formal recognition of the Kolchak government at Omsk. Present indications are that recognition must come before financial aid on this scale can be extended.

The interallied railway commission at Vladivostok has made strong representations to each of the eight countries, urging the making available immediately of this amount of money in the form of credits, so that the system from Vladivostok to the Ural mountains may be put in working order.

The United States, Great Britain, France, Italy, Czechoslovakia, Japan, China and Russia are the countries represented on the railway commission. Italy, the Czechoslovak republic, China and Russia are willing to accept their share of the responsibility for the loan, but cannot supply funds or credits, as everything they have they need for their own people. France, too, needs all her resources.

Japan could furnish both cash and credit if the other allies would permit her to assume the entire burden. Great Britain and the United States are each in a position to arrange the necessary credits, but the bankers of these two countries insist upon having a tangible government back of the loan as a guarantee. The Omsk government is considered stable enough by the bankers to warrant the loan, but until actual recognition is accorded the status and responsibility of the government are in doubt.

TAXES CAUSE PENNY FAMINE

Mints Begin Making 2,000,000 One-Cent Pieces Daily to Supply Demand.

Washington.—Pennies are more in demand than dollars in these days of soda water taxes. Since May 1, when these taxes went into effect, the United States mints and subtreasuries have been flooded with orders for millions of one-cent pieces and these coins have been shipped to banks by the bushels. To meet the continued demand the Philadelphia and Denver mints are working almost exclusively on one-cent pieces, and an extra shift of workers has been ordered for the Philadelphia mint. Two million one-cent pieces will be turned out daily.

QUITS JOB TO REDUCE WEIGHT

East St. Louis Deputy Sheriff Succeeded by Man Who Wants to Gain It.

East St. Louis, Ill.—Desiring to reduce his weight, John Hubert, 6 feet 3 inches tall, resigned as a deputy sheriff and court bailiff in East St. Louis to resume his former job as sergeant of police. As a coincidence, Abbey Laumann, 6 feet 5 inches tall, a former deputy sheriff, who has been losing weight as a machinist in St. Louis, has accepted the appointment to fill the vacancy in order to take on weight.

SERVICE

## LONGEVITY COMMON

IN BRITISH FAMILIES

Often Six to Eight Members Live Above the Average of 85 Years.

The remarkable case of the north country family of Calvert of which eight brothers and sisters have reached an average of eighty-five years, has had many parallels in recent years in England.

The late Lady Mabella Knox was one of nine brothers and sisters whose aggregate ages totaled 769 years. Five of them survived to ninety-nine, ninety-eight, ninety-three, ninety-three and eighty-nine years, respectively.

Of another family all members of the Society of Friends, we read not long ago that three were still living at the ages of one hundred and one, ninety-one and eighty-seven, while five, who were dead, had counted 413 years among them, an average of 87 years. If the members of this family had lived consecutively instead of together the first born would have lived as long ago as the year 1220.

When Henry Wye, sexton at St. Mary's church, Leicester, died not long ago, at eighty-seven, it was said that two of his brothers had predeceased him at the ages of eighty-seven and eighty-five, respectively, while he had two surviving brothers of ninety-seven and ninety-three and two sisters of eighty-three and eighty.

Joshua Jackson of Blackburn, who survived to see his eighty-seventh birthday, was one of eight brothers and sisters, not one of whom failed to pass the eightieth milestone. And quite recently there were living at Milverton, West Somerset, five brothers and sisters, the eldest of whom, Mrs. Shattocks, was ninety-two, and the youngest, James King, just ten years younger.

Misses Wilma Colemeyer and Edna Banta will go to North Vernon this evening to attend the dance at the Philbarg hall.

# FARMER'S PAGE

## POULTRY FACTS

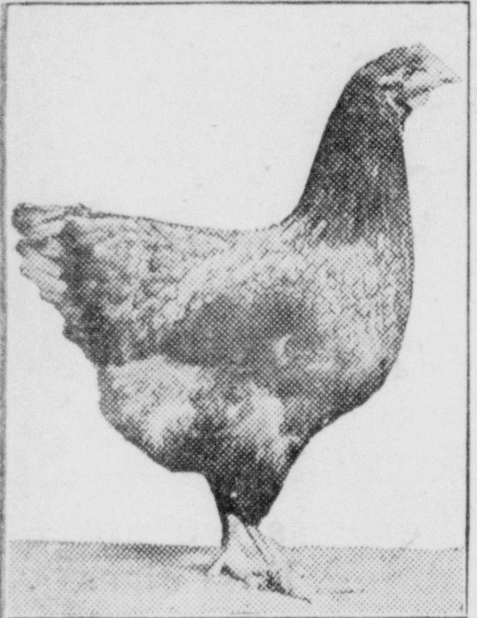

### COTTONSEED MEAL FOR HENS

Experiments on Government Farm Show It May Be Fed to Chickens With Good Results.

(Prepared by the United States Department of Agriculture.)

Cottonseed meal in rather limited amounts has been fed with excellent results, to a pen of 30 pullets on the experiment farm of the United States department of agriculture. These pullets averaged 52.3 eggs each in 20 weeks, from November 1 to March 20, which is practically equal to the best egg yield received during the year from any of the other experimental

A Combination of Utility and Standard Quality.

rallions. No bad effects have been noted from this feed, either in the eggs or in the condition of the fowls, and the hens eat it freely. The ration follows:

Scratch Mixture	Dry Mash
2 pound cracked corn meal	2 pounds cottonseed meal
2 pound wheat meal	2 pounds beef scrap
2 pound oats	4 pounds bran
	5 pounds middlings
	9 pounds corn meal

The scratch mixture is fed sparingly so that the hens eat about equal parts of this mixture and of the dry mash.

A large per cent of cottonseed meal in a dry mash without any beef scrap has not given satisfactory results. Pullets fed a ration with 33 per cent cottonseed meal averaged only 33.2 eggs apiece in one year. A considerable per cent of these eggs had discolored yolks, with green or brownish-green spots, making them unfit for market.

These results appear to indicate that cottonseed meal can be fed at the rate of about 10 per cent of the mash, or 5 per cent of the total ration, with an equal per cent of beef scrap with excellent results. In sections where cottonseed meal is produced, half of the beef scrap in the mash apparently can be replaced by cottonseed meal with excellent results.

### PROFITABLE TO CULL FLOCK

West Virginia Raiser Reduces Number of Hens One-Half and Gets as Many Eggs.

(Prepared by the United States Department of Agriculture.)

That it does not pay to keep poultry in the winter—that is, some poultry—has been demonstrated to at least one West Virginia poultry raiser and his neighbors. Last fall he followed the advice of the poultry extension specialists and culled his flock. From a flock of 81 hens he culled out 39 and sent them to the market. To his surprise the remaining 42 birds produced as many eggs as the original flock and his feed bill was nearly halved.

## POULTRY NOTES

Severe hot weather is hard on little chicks.

Hastily collected eggs for hatching are likely to be disappointing.

A turkey gobbler has strong wings, and strong feet; when he gets cross he can do serious damage to children.

Never market good, strong, vigorous pullets, as these will make your early layers.

A good layer is more active and nervous and yet more easily handled than a poor layer.

Clover and alfalfa hays should be fed in the mash mixture. Some farmers throw a forkful or two of clover in the henhouse occasionally.

## HOOSIER FARMERS ARE BREEDING FOR EGGS

LeRoy L. Jones

How many eggs per hen is it reasonable to expect from a farm flock of hens? One 80-acre farm in Lawrence County reports an average yield of 166 eggs per hen, while another farm with the same breed of chickens reports only 48 eggs per hen.

The average egg production from Indiana farm hens is not far from an average of 80 eggs per hen, altho this average is being raised steadily. Good care and breeding should produce an egg yield of around 10 dozen eggs per hen, with possibilities of even much higher yields for the man who knows how to breed for egg production.

A simple system of breeding for higher egg production on the farm is to breed only from hens which have been selected for breeders after one year of laying. This means that good pullets hatched during the spring of 1918 will be the breeders in the spring of 1920. During August and September of this year these pullets will be very carefully culled for egg production and only those which have proven good layers will be kept over for breeders.

When mating the hens for the breeding season most satisfactory results are usually obtained by using vigorous, early hatched cockerels, instead of older males. There is no need of keeping over the old roosters, especially under average farm conditions. The young cockerels hatched out this spring are usually of equal quality in breeding, and are more vigorous next season.

Because of these breeding facts, Purdue University has established Rooster Week, which this year is June 2 to 7th. During this week all roosters on the average farm should be sent to market. Better summer eggs will be produced, a large amount of food will be saved, often a higher price per pound will be obtained for the roosters, and the breeding problem will be simplified. All farmers are urged to observe Rooster Week this year simply because it is good business practice.

### USE WINDOW BOXES.

How many people realize how much beauty will be added to their houses by the use of window and porch boxes, filled with flowers and vines.

Many who have had porch boxes in previous years, already have them filled for this season. However, it is not too late to buy or make porch and window boxes, and your home will be greatly improved by their use.

The boxes should be six to nine inches deep, six inches or more wide, and any length desired, though over four feet in length makes them heavy to handle.

If you make them at home seven-eighths inch dressed cypress oak, or chestnut should be used and the boxes strongly made since they have to carry considerable weight.

Drainage holes an inch in diameter should be bored in the bottom of the boxes, they should be painted dark green, or some other color in harmony with the house, and when placed should be fastened securely especially if placed outside second story windows.

Soil enriched with well-rotted manure should be used. If of clayed nature some sand should be added.

Pieces of broken flower pots should be placed over drainage holes to prevent them from filling up with earth, the bottom of the boxes covered with an inch or two of rotted manure, straw or leaves, finally the box filled to within an inch or two of the top with soil.

By all means plant vines along the edge to droop over the sides. Such plants as Vincas, English Ivy, or Climbing Nasturtium may be used to good effect.

For the main body of the box select annual flowers that will bloom through a long season and whose colors will not clash with the colors of the house or with each other. Such flowers as geraniums, salvias, stocks, calendulas, ageratums, mignonette, petunias or zinnias are good to use if the boxes are in a sunny location. If partially shaded, begonias will do fairly well, while in shaded spots such foliage plants as ferns and crotons may be used.

It is best to use only a few varieties rather than too many in the planting of porch and window boxes.

## ROAD BUILDING

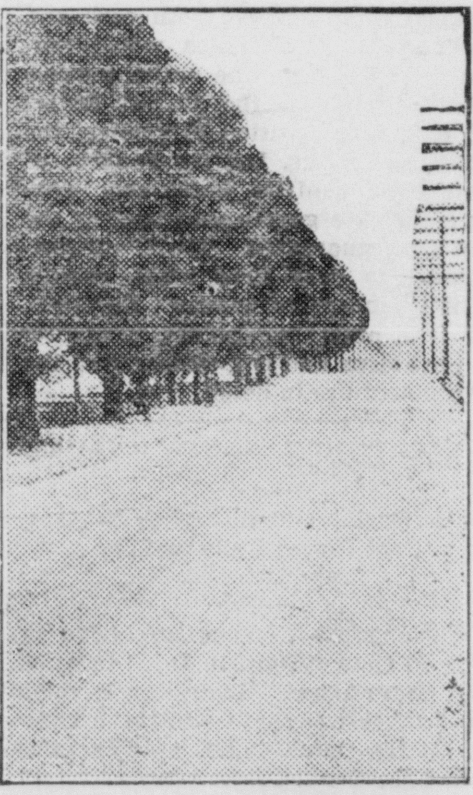

### ROAD BUILDERS ARE NEEDED

Opportunities for Returned Soldiers—Both Skilled and Unskilled Labor Required.

(Prepared by the United States Department of Agriculture.)

In response to requests for information, the bureau of public roads of the United States department of agriculture has collected from the highway departments of the various states figures indicating the profitable number of returned soldiers and sailors that can be used during 1919 in road construction and repair work. Of the 38 states replying only 29 gave definite figures. They report they can use 11,637 soldiers and sailors as skilled laborers, and 91,904 as unskilled. Under the head of skilled labor the state highway departments were asked to report on the requirements for masons, carpenters, quarry bosses, concrete finishers, road foremen, roller men and superintendents. Unskilled laborers were not separated into classes.

The states that have thus far given definite figures, with the estimated number of men that may be used, are: Alabama, skilled 60, unskilled 1,000; Arizona, skilled 48, unskilled 100; Colorado, unskilled 1,250; Connecticut, skilled and unskilled, 4,000; Delaware, skilled 100; unskilled 1,000; Florida, skilled 685; unskilled 4,315; Georgia, skilled and unskilled, 4,000; Idaho, unskilled 200; Illinois, skilled 2,500, unskilled 15,000; Kansas, skilled 1,000; unskilled 4,800; Kentucky, skilled 826; unskilled 3,500; Louisiana, skilled 110, unskilled 1,000; Maine, skilled 100; unskilled 1,000; Massachusetts, skilled, 150; unskilled, 2,000; Michigan, skilled 200, unskilled 2,500; Minnesota, skilled 1,200, unskilled 4,800; Mississippi, skilled and unskilled, 2,000; Montana, skilled 104, unskilled 644; Nebraska, skilled 267, unskilled 2,250; Nevada, skilled 35, unskilled 265; New Hampshire, skilled 332, unskilled 1,000; New

Good Roads Between Annapolis and Baltimore—Job for Many Men to Build and Maintain Road Like This.

York, skilled 1,400, unskilled 7,000; Oregon, skilled 270, unskilled 2,430; Rhode Island, skilled 50, unskilled 450; South Carolina, unskilled, 1,500; Virginia, skilled 900, unskilled 5,100; Washington, skilled and unskilled, 2,000; West Virginia, skilled 700, unskilled 9,300; Wisconsin, skilled 600, unskilled 7,500.

### FEDERAL AID FOR ROAD WORK

Small Amount Paid Out in 1918 Was Because of Steps Taken for Conservation.

(Prepared by the United States Department of Agriculture.)

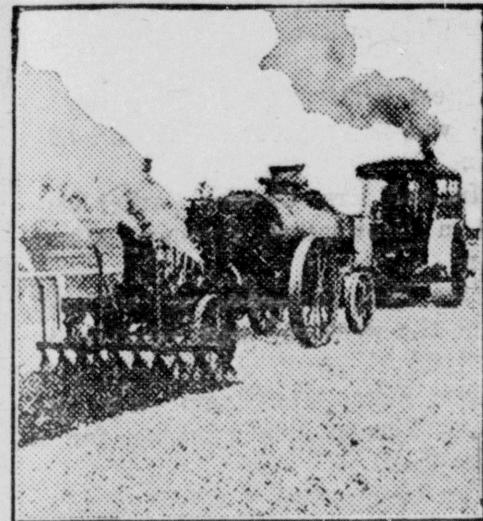

Although \$14,550,000 was available for expenditure on the post roads from the federal aid road act, only \$425,445 was paid from federal funds in the highway construction season of 1918 on all projects. The reason for this, according to the annual report of the secretary of agriculture, was the steps taken to conserve money, labor, transportation and materials in highway work during the war, and at the same time to facilitate really essential highway projects.

In connection with the federal aid road work a letter was addressed to each state highway department asking that a program of federal aid construction be submitted at the earliest possible date, in which would be included only those projects which the state highway departments considered vitally necessary to the transportation facilities of the country.

At the request of the capital issues

committee, engineers of the department were made available for inspecting and reporting upon proposed highway and irrigation and drainage bond issues. Inspections were made of 181 separate projects, involving total bond issues of \$86,912,396. An arrangement was made with the fuel administration whereby highways of special importance should receive enough bituminous material to provide for adequate maintenance, and where necessary to permit construction and reconstruction. From May 13, 1918, when the co-operation became actively effective, until the close of the fiscal year, 2,235 applications, calling for 75,000,000 gallons of bituminous material, were received from states, counties and municipalities. Of this amount approval was given and permits were issued for 58,000,000 gallons.

In order to co-ordinate the activities of various government agencies, so far as they relate to highways; better to conserve materials, transportation, money and labor; to eliminate delays and uncertainties, and to provide positive assistance in carrying on vitally effective highway work, the secretary requested each of the government departments and administrations inter-

Building a Good Road in Massachusetts.

ested to name a representative to serve on a council to deal with highway projects during the period of the war. As a result, the United States highways council, consisting of a representative from the department of agriculture, the war department, the railroad administration, the war industries board and the fuel administration was formed in June. During the first four months of its existence the council passed upon about 5,000 applications, involving nearly 4,000,000 barrels of cement, 3,250,000 tons of stone, 1,140,000 tons of gravel, 1,207,000 tons of sand, over 77,000,000 brick and nearly 20,000,000 pounds of steel, and 140,000,000 gallons of bituminous materials.

### BEST CROWN FOR EARTH ROAD

Machine With Suitable Power and Operator Will Do Work of Many Men With Shovels.

The earth road can best be crowned and ditched with a road machine and not with picks and shovels, scoops and plows. One road machine with a suitable power and operator will do the work of many men with picks and shovels and do it better.

If the road is composed of fine clay or soil it will sometimes pay to resurface it with top soil from an adjacent field, which has sand or gravel mixed with it.

### GROWING RADISH AND CARROT

Seed May Be Sown Together—Radishes Ready to Pull Long Before Carrots Come Up.

Radish and carrot seed may be sown together. The radishes will be ready for pulling long before they become troublesome to the carrots, and the radishes break through the crust, being robust plants, breaking the way for the more delicate plants of the carrots.

### BETTER WAGON ROADS URGED

Farmers Cannot Take Hold of Problem Any Too Quickly—Cost of Hauling Is Too Big.

Better wagon roads are a problem which farmers cannot take hold of any too quickly. It now costs the average farmer 23 cents per ton mile to haul freight over wagon roads, while the railroads receive on an average of only 7.29 cents per ton mile for performing the same service.

### EFFECT OF CLOVER ON SOIL

Same Necessity for Applying Lime as for Wheat—Dress Land When Sowing Seed.

Clover has a mechanical and nutritive effect upon the soil. The necessity of applying lime for the wheat holds also for the clover. Usually the land is dressed with the lime at the time the clover is sown. Twenty bushels of air-slaked lime or one ton of ground limestone is enough for one acre.

"NO HUNTING" SIGNS Printed on Muslin, 10 cents each, 90c per dozen, at the SEYMOUR REPUBLICAN.

## DAIRY

### FOUNDATION FOR DAIRY HERD

Excellent Results Obtained in Starting With Grade Calves From Good Producers.

(Prepared by the United States Department of Agriculture.)

Young calves from good dairy cows are a satisfactory foundation for starting a dairy herd. Ordinarily the method advocated is to grade up common cows with a pure-bred bull, requiring a number of years of patient selection and breeding—a period sometimes discouraging to an energetic dairyman. Frequently this causes farmers, who want results too quickly, to change breeds.

It is expensive to buy mature dairy cows that are free from disease, that have good breeding and show desirable productive ability. Often, especially in new dairy sections, a farmer buys mature stock without being properly prepared to care for it, and many discouragements follow. To a great extent most of this difficulty can be avoided by buying good grade heifer calves from herds of well-established milk production. In some dairy regions it is a common practice to sell the heifer calves for veal. These calves, while only grades, are usually from good producing ancestors and carry a productive ability much greater than common cows.

The buying of such calves to start dairy herds has been tried in several states with excellent results. Of course the cost of small calves is much less than mature animals and the danger of disease is also greatly lessened. In general, shipping is simpler. Calves may be shipped by express at from two to four weeks old, depending upon the distance, with good results, if they are properly cared for upon arrival.

In buying it is important to deal only with dairymen. Do not buy from men who purchase calves at stock yards to ship back to the farmers, because it is not always possible to determine the breeding of the calves, and calves that are physically unfit may be shipped.

In some cases shipments are made C. O. D., which enables the buyer to see the calves before paying for them. A man who sells calves in this way makes a special effort to please his

Plan to Meet Increasing Demand for Milk by Raising Better Dairy Heifers.

customers. It seems desirable, especially in sparsely settled sections, that more attention be given to perfecting a satisfactory system of distributing dairy calves to farmers.

Advantages in buying small calves as a foundation for a dairy herd are summarized as follows:

Small investment.  
Better breeding.  
Greater freedom from disease.  
In case of accident loss is smaller.  
Raising calves stimulates interest and in consequence causes better care of live stock.  
A satisfactory herd can be established more rapidly than by grading up common cows.

### SOLUTION OF FOOD PROBLEM

Dairymen Should Make What They Have Go Further—Not Necessary to Slaughter Cows.

Dairymen can solve the feed shortage by the same method that people are using to solve the food shortage: They can make what they have go further. If food economics can result in feeding more people, the same feed can feed more cows.

No one advocates the killing of part of the people in order to provide an abundance of food for the rest. It is not more necessary to kill large numbers of dairy cows because of a short

feed supply. Such action, moreover, taken in the face of our national need for dairy products, would be calamitous.

### BABCOCK TEST VERY USEFUL

By Its Use Together With Lactometer Composition of Milk Can Be Determined for Solids.

The Babcock test is a device for determining the fat content of milk or cream. With this test and a milk scale one can determine the best cows in the herd. By using the Babcock test and the lactometer together the composition of the milk can be determined for total solids.

### BETTER BREEDING WILL AID

Furnishes Most Economical Way to Obtain Large-Production Cows—Use Best Heifers.

In dairying, large production and profit go hand in hand. Breeding furnishes the most economical way to obtain large-production cows. The pure-bred bull, with generations of high-producing ancestors back of him, must be used for breeding, and only the best heifers from the best cows should be chosen to be the dams of the next generation.

**Cow for Tropical Countries.**  
The black Holstein cow is being urged for dairying in tropical countries.

**Salt is Important.**  
Do you salt the cows regularly? This is just as important as regular milking.

### PROPER LOCATION OF FARM BUILDINGS OF IMPORTANCE

Location and arrangement of farm buildings is of greatest importance in saving time and labor on the farm. A different problem is present, however, on various farms so that it is impossible to lay down any hard and fast rules for locating and arranging buildings. Local conditions such as natural drainage, slope, nearness of a public highway, etc., will affect the placing to a large extent. C. A. Norman, extension man of the Farm Mechanics Department, Purdue University, gives the following suggestions for locating and arranging buildings:

1. The land where the buildings are to be placed must be well drained. The best way to insure this is to place them on a slight slope or elevation.
2. For this section of the country, a southwest slope is the most desirable since it is protected somewhat from the cold and storms of winter.
3. The farmstead should not be located on the top of a hill since in this position it would be exposed to the elements.
4. An ample supply of pure water should be assured before any location is decided on.
5. The farmstead should be as near the center of the farm as possible and still provide ready access to the public highway.
6. Location of the buildings should be such that the fields may be arranged to minimize fence construction.
7. Some form of pasture lot should be near the barns. This affords a place to turn stock for short intervals and makes it possible to observe stock that require watching.
8. A good garden plot should be near the house. Otherwise the land on which the farmstead is built should be the poorest on the farm.
9. The home should be located on the side of the farm nearest the school, church or town wherever possible.
10. The house should not be less than 100 feet from the road. If it is nearer than this, its location will be dusty and it will have the appearance of being cramped close to the road.
11. The outbuildings should be at least 100 feet from the house. The most important consideration in determining this location is the direction of the prevailing winds. For the middle west the best location for these buildings with respect to the house is northeast, east or southeast.

All of these suggestions cannot be taken advantage of in planning any one farmstead, but as many as possible should be used. Where the entire list of suggestions are at least considered, it will be found that a much more satisfactory arrangement and location will be obtained.

## CHAPTER XVI.

### In Dorothy's Stateroom.

I stood crouched, with eye at the crack watchful of every movement in the lighted cabin, my own decision made. I must see and talk with Dorothy. Gunsauls turned down the light and departed along the passage leading amidships. A moment later I heard the sound of dishes grinding together preparatory to being washed. No better opportunity for action was likely to occur, although the situation was not without peril. I crept along close to the side walls, lifted the latch noiselessly, and slipped quickly within. There was no light, except a glimmer of stars through a large after port, but against this faint radiance she stood vaguely revealed. Her first thought must have been Estada, for there was a startled note in her challenge.

"Who are you? Why do you come here?"

"Speak low," I cautioned. "You must know my voice."

"Geoffrey Carlyle!"

"Yes, but do not use that name—all hope depends on my remaining unknown. You welcome me?"

She came straight forward through the dim star shine, a spectral figure, with both hands outstretched.

"Welcome!" her tone that of intense sincerity. "Your presence gives me all the strength I have. But for you I should throw myself through that port into the sea. But I know not how you came here—tell me, you are not one of these wretches?"

"No; you must believe that first of all, and trust me."

"I do—but tell me all you can."

"Is there a divan here, or anywhere we can sit down together? I can see nothing in this darkness."

"Yes; hold my hand while I guide you; we can sit here."

It was a couch of some kind against the outer wall. She did not release her grasp, seemingly gaining courage from this physical contact, and my fingers closed warmly over her own.

"Now, please," breathlessly, "how is

est sailor, and he has told me of others on whom I could rely. There are those aboard—but I do not know how many—who would mutiny if they had a leader and a reasonable chance of success. I must reach these and learn who they are. Fortunately the voyage promises to be long enough to enable me to plan carefully."

"You have discussed the voyage with this man—Estada?"

"He told me what he had decided upon; not to return to their rendezvous until after they had captured some prizes and could go with gold chinking in their pockets."

"Where is their rendezvous?"

"An island in the West Indies, probably not on the chart. They call it Porto Grande."

"And they will sweep the ocean between here and there seeking victims? Unarmed merchantmen to rob and sink? And you will be compelled to take part in such scenes, such acts of pillage and perhaps murder?"

"I presume I must seem to be one of them to avoid suspicion. Have you any suggestions?"

"There is a conspiracy on board already," she said quickly, "that you may not know about."

"You mean to depose Sanchez?"

"Yes; you had suspected it? They thought me unconscious in the boat, and talked among themselves—the two at the stern, Estada and that beast Manuel. I did not understand all they said, but I do not think they intend the captain shall recover."

"You think it best that he should?"

"Oh, I do not know; there is no best that I can see. Yet I would have more faith in being spared disgrace if at the mercy of Sanchez, than his lieutenant. Both may be equally guilty, equally desperate, but they are not the same men. I may be wrong, for I judge as a woman, yet I would feel safer with Sanchez. The other merely desires with the passions of a brute. No appeal would reach him; he would laugh at tears and find pleasure in suffering. And yet you would have me appear friendly with Estada?"

"We cannot permit him to feel that either of us are enemies. He is the power aboard; our lives, everything are in his hands. If he means to be rid of Sanchez the man is doomed, for he will find a way to accomplish his purpose; murder means nothing to these men."

"Of course you are right," she acknowledged. "Our case is so desperate we must resort to any weapons. You believe it will serve the possibility of escape if I permit this monster to imagine that I have some interest in him?"

"To do so might delay the explo-

it possible you are aboard this vessel—an officer?"

I told her the strange story, as swiftly and simply as possible, speaking scarcely above a whisper, feeling as I progressed that I related a dream rather than a series of facts. It seemed to me she could scarcely be expected to believe the truth of what I said, and yet she did, almost unquestioningly, the clasp of her fingers perceptibly tightening as I proceeded. She sat so close beside me that I could feel her breath upon my cheek.

"Why, if—if you had not told me this yourself I could hardly believe such a tale," she exclaimed. "Yet it must be true, miraculous as it seems. But what is to be the ending? Have you any plan of escape?"

"Hardly a plan. I have had no opportunity even to learn the true nature of the crew. Watkins is an hon-

She Lifted Her Eyes.

orable game, I admit, and a disagreeable one, but the case requires desperate remedies."

She lifted her eyes, searching my face through the dim light.

"Geoffrey Carlyle," she said at last, a tremor in the low voice, "there is no sacrifice I would not make to preserve my honor. I hate this man; I dread his touch; I shrink from contact with him as I would from a snake, but I am not going to refuse to do my part. If you say this is right and justified I will consent."

"I believe it is."

"I replied gravely, 'and just now any delay is welcome. I doubt if even Estada will resort to force on board; indeed force will be the very last card he will care to play in your case. You are English and all the practical seamen on board are from northern Europe—English and Scandinavian. These men are not pirates from choice—they are prisoners who have taken on to save their own lives. With his bullies and cutthroats amidships he can compel them to work, but he dare not go too far. Once these fellows unite in mutiny they could take the ship. An assault on you would be dangerous.'"

"It is these men you count on?"

"Yes; but for me to gain their confidence and leadership will require time. The slightest slip would mean failure and merciless punishment. At best the situation is absolutely desperate—but I see no other solution."

"And my service is deceit—the acting of a part to blind the eyes of Estada?"

"I sincerely believe your greater chance of security lies in this course. The fellow is a supreme egotist; opposition will anger him, while flattery will make him subservient. You have the wit and discretion to hold him within certain limits. It is a danger-

"And you will not lose faith in me?" she questioned earnestly. "It will not lower your belief in my womanhood?"

"Nothing could do that. Mistress Dorothy, I want you to realize the depth of my interest and respect. Your friendliness has meant much to me, and I would never urge you to lower your ideals. But we must face this situation as it is. We possess but two weapons of defense—deceit or force. A resort to the latter is at present impossible. I cannot conceive that you are lowering yourself in any way by using the power you possess to escape violence."

"The power I possess?"

"Yes—beauty and wit. These are your weapons, and most effective ones. You can play with Estada and defeat him—temporarily, at least. I confess there is danger in such a game—he is a wild beast, and his evil nature may overcome his discretion. Take this pistol. Keep it hidden about your person, but use it only when all else fails. You retain faith in me?"

"Implicitly."

"And pledge yourself to your part, leaving me to attend to mine?"

Her two hands clasped my fingers, her eyes uplifted.

"Geoffrey Carlyle, I have always believed in you, and now, after the sacrifice you have made to serve me I can refuse you nothing you ask. I will endeavor to accomplish all you require of me. God knows how I hate the task; but—but I will do my best. Only—only," her voice sank, "if—if the beast lays hands on me—he pays the price. I could not do otherwise. Geoffrey Carlyle—I am a Fair-fax."

Satisfied with my mission and confident nothing more need be said, I arose to my feet.

"Then we can do nothing further until I learn the disposition of the crew," I said quietly. "Estada is not likely to resort to extreme measures at present. That is why I believe you are comparatively safe now—his own position of command is in the balance."

"I will see you again?"

"Perhaps not here; it is too dangerous; but I will find means to communicate with you. Good-by."

We stood with hands clasped in the darkness. I thought she was going to speak again, but the words failed to come. Then suddenly, silently the door opened a mere crack, letting in a gleam of yellow light from the main cabin, while the crouching figure of a man, like a gliding shadow slipped through the aperture, closing the door behind him as softly as he had opened it. I heard her catch her breath and felt her hands grasp my sleeve, but I never stirred.

Who could he be? What might be the purpose of his entrance? But one answer occurred to me—Pedro Estada, driven by unbridled passions to attack the girl. I thrust her behind me, and

took a step forward, with body poised for action. I was unarmed, but cared little for that in the swift desire to come to hand grips with the brute. I could hear him now, slowly and cautiously feeling his way toward us through the darkness.

(TO BE CONTINUED)

## Monster Screen at Methodist Centenary.

Finishing details are being placed on the arrangements for the erection of the largest screen for the projection of pictures ever built in the world. This is to be one of the features of the Methodist Centenary Celebration, to be held in Columbus, June 20 to July 13.

This monster screen will have a surface for pictures 115x115 feet. The actual structure will be several feet larger in each direction. A special lantern has been successfully devised for throwing these tremendous pictures the necessary distance. The screen will be 250 feet from the nearest spectator and will be built to withstand 40 pounds pressure to the square foot. The lantern which will project these pictures has already successfully thrown pictures on a screen in New York City across a distance of four and a half city blocks. According to Architect Harry C. Holbrook, the screen will be, in effect, three sides of a house. It is necessary to give it the foundations equivalent to a four-story building.

In order that there may be as much salvage as possible after the screen has served its purpose, the picture face will be of fitted lumber, which later will be treated with a white surface preparation.

The estimated cost of this screen will be \$8,000. The screen and the lantern will be used in showing the tens of thousands of views, made all over the world by the Methodist Missionary Survey, which has the finest collection of pictorial reviews anywhere in the world.

## RUTGERS DROPS GREEK RULE

Study of Dead Language No Longer Required for Bachelor of Arts Degree.

New York.—One of the last strongholds of the classical tradition in education fell when the trustees of Rutgers college at New Brunswick, N. J., decided to abolish the requirement of Greek for the bachelor of arts degree.

A strong fight was made by the scientific school faction to have both Latin and Greek required of candidates for the A. B. This failed, but hereafter only one year of Latin will be required.

Rutgers is one of the strongest proponents of the classics. It was the eighth college founded in this country and was formerly connected with the Reformed Dutch church. For the last half century it has been the state college of New Jersey.

The trustees gave permission for a \$200,000 memorial building to the Rutgers men who were killed in the war.

Temperamental Differences.

She—A man doesn't love as long as a woman.

He—Humph! She doesn't love long if she finds the man is short.

Their Class.

"What kind of whiskers are those they say jokes have on?"

"I should think they were chin whiskers."

## A Woman's Story With Great Meaning

Subject of Childbirth Discussed by Women of Experience.

Women everywhere tell their friends how, through the use of Mother's Friend, the wonderful penetrating external application, they avoided suffering and distress before the advent of nature's most wonderful evolution.

Mother's Friend is a remedy which spreads its influence upon the cords, nerves and ligaments involved, rendering them pliant to readily yield to nature's demand for expansion. The nerves, cords, tendons and ligaments expand without that peculiar wrenching strain, and nervousness, nausea and unrestful sensations are naturally avoided when the nerves and muscles are relaxed and thus are not tort and drawn.

By regular use, the lower abdominal region expands with ease when baby is born, the hours are less at the crisis, and pain and danger is naturally less.

You can obtain Mother's Friend from any drug store. It has been used by women for over half a century, and is just as standard as anything you can think of.

Write the Bradford Regulator Company, Dept. H. Lamar Building, Atlanta, Georgia, for their Motherhood Book, and get a bottle of Mother's Friend today, and thus fortify yourself against pain and discomfort.

## Where Can I Find Relief From Itching, Terrifying Eczema?

### Question on Lips Afflicted.

There is a harassing discomfort caused by Eczema that almost becomes a torture. The itching is almost unbearable, and the skin seems on fire with the burning irritation. A cure from local applications of salves and ointments is impossible, because such treatment can only allay the pain temporarily. The disease can only be reached by going deep down to its source, which is in the blood, the disease being caused by an infection which breaks out through the skin. That is why the most satisfactory treatment for all so-called skin diseases is S. S. S., for this remedy so thoroughly cleanses the blood that no impurities can remain. Get a bottle today, and you will see results from the right treatment. Medical advice free. Address Medical Director, 48 Swift Bldg., Atlanta, Ga.

## MORE RED BLOOD AND STEADIER NERVES FOR RUN DOWN PEOPLE

The World Demands, Strong, Vigorous, Keen-Minded, Men and Women

It has been said of Americans that they work their habits overtime.

Many become nervous and inefficient by overwork. By worry, despondency, social affairs, robbing brain and body of needed rest; excessive use of tobacco, indulgence in strong alcoholic drink—excesses of every kind that burn up the vital powers so necessary in these trying times to make both men and women fit to be of help to themselves and others.

It is time to be temperate in all things. The man or woman with impaired nerves caused by impoverished blood lacks vigor, the ambition, the endurance and the keen mind of those who avoid excesses.

Timidity, despondency, fear, trembling hands, want of confidence and even cowardliness, are due in a large measure to abused nerves. People with plenty of red blood corpuscles and strong, healthy nerves have no desire to shirk work and lean on others for guidance and support.

There is hardly a nerve-shattered man or woman (unless of an organic disease) in America today who cannot become alert and clear in mind; vigorous and energetic in body in a very few weeks and at trifling cost.

To become strong and ambitious, to feel that work is not drudgery; to have steady nerves, abundance of red blood and power of endurance; to be not only a man but as men now go, a superman, you must take seven tablets of Bio-feren every day for seven days—and take them faithfully.

Take two after each meal and one at bedtime and after seven days take one only after meal until the supply is exhausted.

Then if you feel that any claim made in this special notice is untrue—if your nerves are not twice as steady as before; if you do not feel ambitious, more vigorous and keen-minded, the pharmacist who dispensed the tablets to you will gladly hand you back just what you paid for them.

Bio-feren is without doubt the grandest remedy for nervous, rundown, weak, anemic men and women ever offered direct through druggists and is not at all expensive. All druggists in this city and vicinity have a supply on hand—sell many packages.

## Interstate Public Service Company

### Seymour to Indianapolis

Hoosier Flyers leave Seymour for Columbus, Edinburg, Franklin, Greenwood and Indianapolis at 9:18 and 11:18 a. m. and 1:18, 3:18, 6:18 and 8:18 p. m.

Local Cars leave Seymour for Indianapolis and all intermediate points at 6:55, 8:05, 9:55 and 11:55 a. m., and 1:55, 3:55, 5:18, 8:00, \*10:45 and 11:40 p. m. Car marked \*, runs to Greenwood only. Car marked x, runs to Columbus only.

For special service see Scott Hardin, local agent, or address Bert Weedon, G. F. & P. A., 510 Board of Trade, Indianapolis, Ind.

## Seymour to Louisville

Last Car Leaves Louisville 11:15 p. m.

**LIEUT. T. H. MONTGOMERY  
RETURNS HERE FROM FRANCE**

Arrived in United States About Ten Days Ago and is Mustered Out at Camp Sherman.

Lieut. T. H. Montgomery, son of Judge and Mrs. O. H. Montgomery, North Walnut street, arrived home at midnight Sunday from Camp Sherman, O., where he was mustered out of military service. He arrived in the United States from France about ten days ago and after a short stay at Camp Dix was transferred to Camp Sherman for discharge.

Lieut. Montgomery, with the training of a soldier, believes in preparedness and when he left home he retained a key to the front door. His parents thought that he might return Sunday night but did not know that he carried the key and believed that he could not enter without arousing them. Their surprise, of course, was unbounded, when they found he had returned.

Lieut. Montgomery received his commission at the first officers' training camp at Fort Benjamin and was stationed at Louisville for several months before sailing. His company was ready to move to the front when the fighting ceased. Before entering military service he was deputy prosecuting attorney and will resume his law practice in this city.

### ADDITIONAL PERSONAL.

Rae Gilbert spent Sunday in Louisville.

Paul Becker has returned from a week-end visit in Indianapolis.

Louis Roeder and George Schroer have gone to Indianapolis on business.

Miss Carrie Perry, of Crothersville, spent today in Seymour on business.

Mrs. B. F. Schneck left today for Marion, Ohio, to spend several days with relatives.

Mrs. Julia A. Newby, of Indianapolis, is the guest of relatives and friends in this city.

Misses Martha Loertz, Marie Niehter, and Irene Vogel spent Sunday in Louisville.

Mrs. Earl Cox left this morning for Indianapolis, where she will attend the Shriners' Convention.

Mrs. Elizabeth Drago left this morning for Indianapolis, where she will be the guest of her son, Verner Drago.

Mrs. Sadie Veil, of St. Louis, was in the city this morning enroute home after a visit with her father, Geo. W. Zollman at Medora.

Misses Dorothy Kiel, Eleanor Sasse and Mabel Hubbard, returned to this city this morning from a week end visit with relatives in Jonesville.

Mr. and Mrs. Joe Coates and daughter, Ruth, returned to Madisonville, O., this morning after spending the past week with relatives in this city, Brownstown and Crothersville.

Mr. and Mrs. Henry G. Vondielingen and son, Paul, left this morning for their home in Indianapolis, after a several days' visit with his parents, Mr. and Mrs. Henry Vondielingen, Sr.
